We are continuing to work on the remaining dates of the 2019 WSC Webinar Training schedule. Once those have been finalized a copy of the schedule will be sent out via an advisory. We have received great feedback on from the 2018 webinars and are glad to be able to provide WSCs with the opportunity to earn annual training credits via these webinars.

In-service credits will be provided for WSCs with documentation of participation. The documentation method will be identified during the in-service training. When an assessment is required for a training, a scoring rubric will be provided and each WSC must complete the assessment with a passing score to earn credit for attending the training. This year, we will be using the Webex Platform, please review the attached information regarding connecting to Webex Trainings and troubleshooting.
