As we approach hurricane season, this workshop will prepare APD's Waiver Support Coordinators with the information and tools they need to both personally survive a disaster and assist those in their care to survive. The complete disaster cycle will be discussed: Preparedness, Response, Recovery, and Mitigation, along with information about the local, state, and federal response and the resources that are brought to bear. The role of the WSC throughout the disaster cycle will be outlined along with that of APD. Essential elements of information necessary for WSCs and their clients to prepare for and recover from a major disaster will be the focus of this workshop.

If there are any questions or concerns, please contact Susie Siets at susie.siets@apdcares.org.
